ASOR 2016 Annual Meeting

The Annual Meeting of the American Schools of Oriental Research (ASOR) was held at the La Cantera Resort and Spa, in San Antonio, TX from November 16-19, 2016. This year there were 95 sessions, in which 472 papers were presented. In addition, there were 37 poster exhibits. The plenary address was presented by Susan Parcak of the University of Alabama, Birmingham, entitled “Toward a 21st Century Archaeology of the Near East: Technology, Big Data, and Citizen Science.”

Madaba Plains Project members and affiliates who presented papers this year included: L. S. Baker, Jr. (A Comparative Analysis of Iconographic Depictions of Assyrian and Egyptian Military Camps), Josephine Verduci (Metal Jewelry of the Southern Levant and Its Western Neighbors: Surprising Results Concerning Cross-Cultural Influences during the Early Iron Age), Michael Hasel (The Elite Houses of Area AA and the Date of the Palace-Fort of Tel Lachish), Martin Klingbeil (Four Judean Bullae from the 2014 Season at Tell Lachish), Bethany Walker (Regionalisms in Settlement and Land Use in Late Medieval Syria: Highlands and Hinterlands), Ralph Hawkins (Settlement in the Jordan Valley During Iron Age I), Justin Singleton (Adaptation of a Semipalatial System of Mokarta, Sicily), Giorgia Lanzarone (The Sacredness of the Water between Paganism and Christianity: The Movement of a Symbol from the Near East to Sicily), Elisabeth Lesnes (The Village and Basilica of San Miceli in its Historical and Cultural Context), Randall Younker (The Emergence of Christian Culture in Western Sicily), Jody Washburn (The Family Tomb as an Inscribed Artifact: A Material and Spatial Analysis of the Beit Lei Inscriptions), Matthew Grey (The 2015-2016 Seasons of Excavations at Huqoq), Øystein LaBianca (Archaeology Engaging the

(cont’d on p. 2)
Anthropocene), Douglas Clark (The 2016 Excavations at Tall al-‘Umayri, Jordan), Amanda Hopkins (Viticulture on the Rocks: An Investigation of Wine Production and Distribution at Site 84), Stephanie Brown Eating Like Elites? Domestic Foodways at Busayra), Owen Chesnut (The Hellenistic Period at Tall Safut), Abelardo Rivas (Figurines of Jalul Field G: What is Left of Domestic Religion), Chang-Ho Ji (The Ataruz Inscription and Iron II Temple at Khirbat Ataruz: New Light on Stratigraphy, Chronology and Cultic Activities), David Graf (The Revision of a Nabataean Inscription from Ba’aja I near Baidha), Stefanie Elkins (The Khirbat ‘Ataruz Iron IIA Cult Stand), Moise Issac (Iconization in Neo-Assyrian Representation of Israelite and Judean Exiles), Kristina Reed (Aging Ancient Human Remains from the EB IB Dolmen at Tall al-‘Umayri, Jordan), and Helen Dixon (Perfuming the Dead: Evidence for the Use of Aromatic Oil and Resins in Phoenician Mortuary Practice).

Those who chaired sessions for the program this year include: Michael Hasel and Martin Klingsbeil (The Fourth Expedition to Lachish, 2013-2016: A Report on the First Four Seasons, Sessions I and II), Elisabeth Lesnes and Randall Younker (Sicily and the Levant), Helen Dixon (Archaeology of Lebanon), and Lawrence Geraty, with Thomas Schneider, Thomas Levy and Brad Sparks (Israel’s Exodus in Transdisciplinary Perspective). In addition, Douglas Clark and Kent Bramlett presided over the Madaba Plains Project-‘Umayr Workshop, Douglas Clark over the Madaba Regional Archaeological Museum Project, Bethany Walker over the Consultation of Dig Directors in Jordan, and Lawrence Geraty over the Madaba Plains Project Staff Consultation.

The poster session included entries by Vivian Laughlin (The Utilization of Serapis from 30 B.C.-A.D. 230 within Roman Elite Houses in Italy). Michael Orellana (The Legacy of Inanna), and Kristina Reed, with Karimah Kennedy and Sara-Hee Lee (Pathologies from Human Remains of the Early Bronze Age IB Dolmen at Tall al-‘Umayri).

Concurrent Annual Meetings of the Society of Biblical Literature (SBL) and the Near East Archaeological Society (NEAS) were held from November 19-22 and 15-17, 2016 respectively. (Paul J. Ray, Jr.)

Hendrix Dies

Ralph Edwin Hendrix, a former staff member of the Institute of Archaeology, passed away June 15, 2016, at age 58, from a stroke. He was born in Greer, South Carolina, and has lived in Walla Walla, Washington area the past twenty years.

Ralph joined the Airforce in 1976 after graduating from high school in Duncan, South Carolina. He became a Gas Analysis Technician at the McClellan Central Laboratory and earned the position of Grade E-4, Sargent. After an Honorable Discharge from the Airforce in 1982, he attended Pacific Union College, Angwin, California, earning a BA in Religion in 1985. He served as a pastor of the Seventh-day Adventist Church in Winnemucca, Nevada for a year, after which he married Carrie Hannum, and moved to Berrien Springs, Michigan, where he earned an MA in Old Testament Studies from Andrews University in 1989, working part time at the Horn Museum as an student assistant to the curator, who at that time was David Merling. After graduating, Ralph worked for seven years (1990-1997), at the Institute of Archaeology, as the Publications Director. While there, he coauthored, with Philip Drey and B. Bjorn Storfjell, the book Ancient Pottery of Transjordan: An Introduction Utilizing Published Whole Forms—Late Neolithic through Late Islamic, a field guide for identifying ancient pottery, published in 1996, a tool which is still used.

Ralph continued his career in publications upon moving to Washington, working for the Union Bulletin, as an advertisement designer, for 16 years. Throughout his life he was a prolific writer on a variety of topics, including cowboy poetry and songs, a novel of the Civil War (from the Southern perspective), and short stories, exploring esoteric concepts. After retirement, he continued to study philosophy, history and comparative religions, concentrating on the origins of myths and legends that run through many cultures and religions. He also compiled a book on the medicinal properties of many Northwest native plants, many of which grew on their own property in the foothills of the Blue Mountains.

Dr. Øystein LaBianca, of the Institute of Archaeology, remembers Ralph as having made a singularly important contribution to Levantine archaeology by serving as the editor of Hesban 13 Faunal Remains. “Until now it remains the only book-length volume dedicated to presenting findings of ethnoarchaeological, taphonomical and zooarchaeological research on animal bones from a single archaeological site, namely Tall Hisban.” Randall Younker, the Director of the Institute of Archaeology, remembers him as dedicated, innovative, motivated to make a difference and getting things done, but also fun to work with. “We had some good trips together, and I especially...”
remember him at the 1990 Gezer excavation, particularly our van being blown up near his window (where fortunately he was not!!!) as well as his work on the site. His book on pottery, with Phil Drey and Bjornar Storfjell, was an important contribution to the archaeology of Jordan.” Paul Ray, current Director of Publications at the Institute of Archaeology, remembers Ralph while he was a student assistant, putting together a fenestrated bowl from Late Roman period Hisban, from pieces he found in a box in the museum, and later in terms of the the excellent example he set as Publications Director. He will be missed!!! (Union-Bulletin obituary edited and expanded by Paul J. Ray, Jr.)

Madaba Plains Project 50th Anniversary Celebration Events:

- **Sept. 28-30, 2017**  Andrews University, Berrien Springs, Michigan  Alumni Weekend and MPP Reunion
- **Nov. 15-19, 2017**  Annual Meeting of the American Schools of Oriental Research, Boston Massachusetts
- **July 5-15, 2018**  MPP@50 Tour of Israel and Jordan  Celebration at Tall Hisban (Wed 7/11/2018)
- **Nov. 10-11, 2018**  MPP@50 Celebrations, La Sierra University Riverside, California
- **2019 TBA**  International Congress of History and Archaeology, Florence, Italy

DNA and the Ancients:
The results of recent DNA research indicates that the ancient Minoans and Mycenaenans were genetical-
ly similar, sharing more than 75% of their ancestry with Neolithic period farm-
ing peoples from Greece and western Turkey, the remaining 25% with peoples from Armenia, Georgia and Iran. Genomic data from 19 ancient Greeks was com-
pared with published data generated from nearly 3,000 people, ancient and modern. The Minoan civilization existed from ca. 2600-1100 BC and the Mycenaenans from ca. 1700-1050 BC.

More of Ostia Unearthed:
Archaeologists have recently unearthed a large section of Ostia, the ancient Port of Rome, near
the mouth of the Tiber River, ca. 20 miles from the capitol. The new excavations have increased
the known area of the ancient city, indicating that the Tiber bisected the city instead defining its
northern boundary. New finds include massive warehouses.

New Mummy Found:
Archaeologists have recently discovered a mummy buried near a 2nd-millennium BC temple on the
west bank of the Nile River, not far from Luxor, Egypt. The mummy, which is in excellent condition of
preservation, was found in a brightly-colored wooden sarcophagus depicting Egyptian funerary symbols, including the
deities Isis and Nephthys, in a tomb dating to the Third Intermediate period (1069-664 BC), thought to
have belonged to a nobleman, named Amenrenef, who was “a servant of the royal household.”

New Finds in Lebanon:
The remains of at least four ceramic female busts, dating to ca. 500 BC have recently been have been
discovered in an ancient waste dump in the town of Porphyreon, near Sidon, Lebanon. The objects have a
mixture of Greek, Phoenician and Egyptian traits.

Hoard and Fabric Found:
A hoard of objects wrapped in linen and placed in lidded-ceramic vessel, has been found in a room excavated at the Tel Gezer, Israel.
The hoard dates to the Middle Bronze Age and includes a silver pendant, with an embossed disc and an eight-pointed star, as well
as a gold-coated Egyptian scarab. The linen weaving pattern was in a twist of two threads and remarkably well-preserved due to
being pressed against the precious metals inside the vessel.
